HOBBIES & INTERESTS

Travelling and running to keep fit.

WILSON NGENE WAROKO- Nairobi, Kenya

Systems Lead and Digital Transformation

CAREER HISTORY:

The Square Kilometre Array Observatory (SKAO)

July 2025 - June 2026

**Unit4 ERP Developer
Development and Testing**

Jodrell Bank, Cheshire, UK

Perform back-end and front-end development of the Unit4 ERP system and conduct end-to-end testing.

Integration

Liaise with other system owners to create and enhance Unit4 ERP interfaces (using APIs and other tools).

Project Management

Self-manage and project manage Unit4 ERP development projects through to completion.

Documentation and Training

Create technical documentation, policies, training materials, and user guides for new functionality, and then deliver the training.

System Support

Fix bugs and provide second-line helpdesk support for new functionality during the post-implementation period.

Working Environment

Work across different time zones and be flexible, with potential for travel (UK and infrequent international).

Norwegian Refugee Council

October 2023 - Present

Regional Systems Coordinator East and Southern Africa Nairobi

Under the overall supervision of Regional Support Director ESA region, I was responsible for:

System and tools development:

Responsible for the data architecture and technical development of NRC's Unit4 ERP system and tools to ensure efficient processes, and accountability to donors.

Responsible for the continuous adaptation and customizations of NRC's Unit4 system, procedures, and tools through innovation in close cooperation with Head Office (HO) departments, Regional Offices (RO), Country Offices (CO) and Representation office (RepO), donors and NGO partners.

Policies, strategies, and guiding documents:

Responsible for the development of policies, strategies related to our Unit4 ERP solutions and guiding documents to reflect the requirements of and demands from all stakeholders.

Active contribution to increased integration and coordination efforts between NRC functions and systems at all levels of the organization.

WILSON NGENE WAROKO- Nairobi, Kenya

Systems Lead and Digital Transformation

Capacity development and technical support:

Responsible for the provision of capacity development through seminars, trainings, webinars and coaching along the technical reporting lines to HO, ROs, COs and RepOs.

Compliance, control and reporting:

Responsible for the access setup to NRC's Unit4 system to secure adherence to data protection regulations and NRC data policies.

Data analysis and monitoring:

Responsible for providing analysis of financial data and development of recommendations to senior management. Responsible for supporting and challenging Head Office departments, Regional Offices and Representational Offices on budgeting and monitoring and use of NRCs tools.

Responsible for development of visualization of relevant financial data in charts and dashboards in line with organizational needs.

Alignment and coordination:

Responsible for report on deviations from established policy and procedures, and to recommend corrective actions.

Learning and information sharing:

Responsible for the institutionalization of learning into policies, strategies, handbooks, and guidelines in Unit4 for internal communication, technical exchange and information sharing on learning and best practices in Unit4

December 2018 - September 2023

Financial Management System Administrator

Save The Children International

Nairobi

Under the overall supervision of FMS scrum master, I was responsible for:

- Performing AGRESSO ERP business analysis, requirement, design and developments, in accordance with agreed FMS development sprint and enhancement using Scrum Agile Methodology. (70% of role)
 - Responsible for the scheduling of processes; the management of multiple environments and the release of application changes between environments (e.g. from development to test; from test to production); the user read/write access to datasets; period end and year end roll over activities; the maintenance of application menus; maintaining the responsibility profiles to which users are mapped.
 - Ensures interfaces between different applications run as expected (e.g. file transfers)
- Data Maintenance: Master Data Maintenance (MDM) of core datasets in Finance systems including, but not limited to, cost centres, general ledger codes, product codes, project codes, accounting periods, etc (10 % of role)
 - Ensures data hierarchies are built and maintained in line with requirements.
 - Working with the Business Intelligence (BI) developers to create optimized queries users are documented.

WILSON NGENE WAROKO- Nairobi, Kenya

Systems Lead and Digital Transformation

- Offer Uni4 system support for Save the children global users at London center, Regional, Country and Sub Office levels, which includes logging and management of 3rd and 4th level support calls with the Agresso vendor, Unit4 using JIRA. (20% of role)
 - Proactively check all support ticket system queues, participate fully within the global shared support model in third line System Support.

Software Developer

August 2016 - November 2018

Henry Jackson Foundation - KEMRI

Influenza Program, Nairobi

Under the overall supervision of the **Data Manager**, I was responsible for:

- Design, code, test, debug and implement data capture and management systems using Microsoft Visual Studio .Net IDE.
- Designing and maintenance of SQL Server replication databases for the influenza program in an accurate, reliable and timely fashion.
- Analysis and dissemination of weekly influenza surveillance reports forming part of the WHO global reports using STATA
- Installing and configuring computer systems in the Netbooks for SQL merge replication using Replication Management Objects (RMO).
- Diagnosing hardware and software faults and solve technical and applications problems coming from the surveillance officers, either over the phone or in person or remotely.
- Creating table indexes to improve database performance
- Designing and maintenance of SQL Server replication databases for the influenza program in an accurate, reliable and timely fashion.
